DISTRICT 1 REPORT

For The Quarter Ending December 31, 2021 | FY22 Q2

PREFACE

We are pleased to present the Broward County Public Schools (BCPS) **School Spotlights** specifically designed for our School Board Members serving in countywide school districts.

SMART (Safety, Music & Art, Athletics, Renovation and Technology) is the \$800 million capital improvement program to upgrade existing school facilities and to purchase new computer technology, athletic equipment and musical instruments to enhance the learning experience of Broward County students.

The **School Spotlight** is a quarterly report that details the progress of facilities projects at each of the 232 schools participating in the *SMART Bond Program*. This District Board Member edition provides a school-district breakdown of all approved renovation projects, projected costs, School Choice Enhancement Program initiatives and other ongoing or scheduled SMART Program projects.

These easy-to-read School Spotlights allow board members to better follow the progress of the facilities improvements within their specific school districts. The Spotlights will be updated every quarter to help board members share timely information with parents, students, school staff, volunteers, business groups, community organizations and other stakeholders as the projects progress.

TRAFFIC LIGHT INDICATOR OF VARIOUS RISK LEVELS

analysis should be performed, if this risk still shows unacceptable or medium risk redesign and or ranges should be introduced to reduce the criticality.

The risk may be acceptable but redesign or other changes should be considered if reasonably practical.

PROJECT UPDATE

The contractor is remobilizing to the site in December to complete defective scope and to complete the remaining scope. Coordination with the school is on-going. At the current moment OAC is working on providing an updated milestone construction schedule. There are multiple submittals in process of been approved, ASI 17 which is the revise drawing to identify location of walls affected by asbestos, another will be the exterior louver shop drawings which is in on the contractor queue. Moreover, we had the architect and engineer of record met with us at the school to verify and inspect the work in place, with that been said they created a deficiency list which included mechanical and building deficiencies. Soon after we met with OAC to start working on the list and some items that were critical, for example the AC in room 601, a temporary fix to secure the classroom's louvers and start working on two AHU's units.
